

Chemical Storage Tanks

Enduro Composites has been manufacturing corrosion resistant fiberglass tanks and piping systems since 1954. With state-of-the-art manufacturing equipment and a commitment to exemplary customer service, Enduro offers fiberglass solutions for the Water & Wastewater, Steel, Pulp & Paper, Pharmaceutical, Chlor-Alkali, Petrochemical, Mining, and Specialty Chemicals Industries.

SPECS

- Size up to 15'6" diameter
- Options and Fittings:
flat, domed, sloped or conical tops and bottoms, flanges, manways, walkways, ladders, sight glasses, leak detection, insulation, heat tapes and more
- Quality engineered, designed and built to your exact service conditions
- Built to meet or exceed the rigid ASTM D4097 (hand lay-up custom contact molded equipment), ASTM D3299 (filament wound fabrication) or built to ASME Section X and RTP-1 standards and specifications
- Quality, premium resin systems available for standard or specific service conditions

BENEFITS

- Corrosion Resistant
- Economically Competitive
- 60 Years of Experience
- Field Erection Capability
- Ultraviolet Light Stabilized
- Pigmented Resins
- Lightweight
- Strong and Durable

ENGINEERING

Enduro has a professional engineering staff that is available to assist you in the design of your FRP equipment. We design to meet the requirements for your site-specific foot print, seismic, wind load and chemical conditions. Enduro specifications and drawings are available on computer disc.

SOLUTIONS

- Vertical Tanks
- Dished Top
- Open or Flat Top
- Open Top with Cover
- Flat Bottom
- Horizontal Tanks
- Dished Bottom
- Conical Bottom
- Insulated Tanks
- Sloped Bottom

AVAILABLE OPTIONS

- Loose Cover
- Bonded Cover
- Dome Top
- Rim Flange
- Flat Tops
- Flat Tops Hinged
- Mixer Pad
- Mixer Mounts
- Tie Down Lugs
- Flanged Nozzles
- Flanged Siphon Drain
- Flanged Full Drain
- Couplings
- Lifting Lugs
- Sight Strips
- Manways
- Vents
- Legs
- Skirted Tanks
- Seismic Calculations
- Structural Calculations
- Ladder with Optional Safety Cage & Handrail
- Optional Colors
- Instrumentation & Level Control Options
- Tank Heaters

TANK SIZES AND STYLES

Enduro manufactures round, rectangular and cylindrical tanks, above ground or underground designs, as well as shop fabricated and field fabricated large diameter. With our expertise in the construction of fiberglass tanks, we can ship a completed tank to the field for installation or we can fabricate large diameter tank components in sections and sized for shipment to the job site. Our highly qualified field crews are then dispatched and can quickly assemble the components to form the completed tank. Other options include shop-fabricating tanks for transport by barge to water-accessible jobs. At Enduro, we provide options by offering many tank modifications and several other tank sizes, and we can also provide specialized designs and construction wherever required.
