ENDURO COMPOSITES & TUFF SPAN™

For demanding conditions, **Tuff Span™** FRP building panels, beams, ventilation and gutter system is The Proven Solution. Delivering outstanding performance and important benefits, Tuff Span from Enduro is the global leader for glass Fiber Reinforced Plastic (FRP) building products.

Corrosion Resistance

Superior Strength

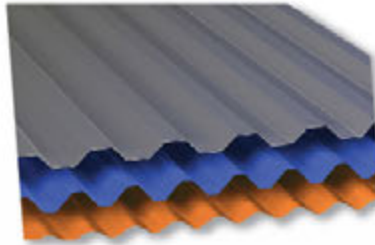

Life Cycle Cost Savings

Maintenance Free

FRP ROOFING & SIDING PANELS

With unsurpassed combination of corrosion resistance, strength and UV protection, **Tuff Span™** is the optimum cladding panel for challenging, tough conditions.

- Opaque or Translucent Panels
- Strongest FRP Building Panels
- Single Skin or Insulated
- FM & UL Certifications
- Walkable Roof Panels
- Superior UV Protection
- Wide Range of Profiles

FRP ROOF DECK

With outstanding corrosion resistance, **Tuff Span™** Fiberglass Reinforced Plastic Roof Deck provides long term structural support for single ply membrane and built up roofing materials.

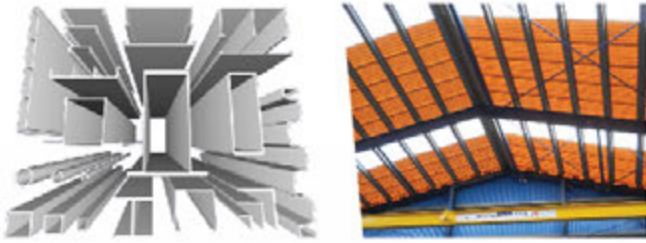

- Superior to Metal or Wood Roof Deck
- Does Not Rust, Rot, Peel, or Flake
- Resists Creep under Dead Load

PROVEN UNDER THE TOUGHEST CONDITIONS

At a power plant on the Florida coast, Tuff Span roofing and siding (on end wall) was undamaged by Hurricane Charley's 145 mph winds. Corroded metal panels (on side wall) were damaged or blown off.

FRP STRUCTURAL SHAPES

By innovative use of shape, glass fiber reinforcing, and manufacturing process, **Tuff Span™** Flanged Tube Beams are designed for long spans and heavy loads. Corrosion resistant, standard shapes include FRP flat plate, angle, tube, and wide flange sections.

- Primary Framing Members
- Roof Purlins and Wall Girts
- Complete Line of Shapes

FRP LOUVERS\ RIDGE VENTS

Tuff Span™ fiberglass reinforced plastic louvers and ridge vents provide air flow for industrial facilities and compliment FRP roofing and siding panels.

- Strong & Durable
- Fixed or Adjustable Openings
- Size & Color Options

FRP FORM DECK

Steel form deck and reinforcing bars, and slabs are vulnerable to chemical exposure. For these conditions, **Tuff Span™** FRP Form Deck provides a permanent form and corrosion protection for the underside of slabs.

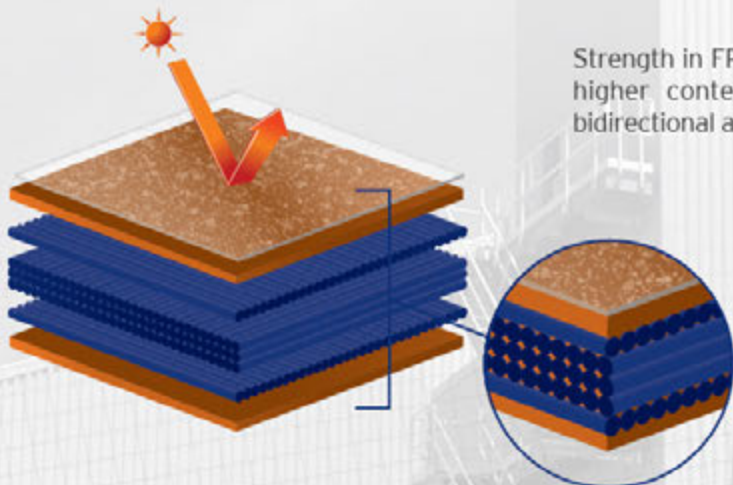

- Reliable Support for Wet Concrete
- Permanent Form for Concrete
- Improved Plant Safety

FRP GUTTERS

Tuff Span™ gutter and downspout provides moisture drainage at industrial facilities. Eliminating the need for hangers and brackets, a continuously-hinged flange pivots to fit any roof pitch.

- Corrosion Resistant
- Adjustable Mounting Flange
- Complete System w/Accessories

Strength in FRP is controlled by its reinforcing content and alignment. With higher content of continuous glass fiber reinforcements in straight, bidirectional alignment, Tuff Span is the strongest profiled FRP building panel.

- UV acrylic polymer coating protection
- Corrosion resistant UV stabilized, fire retardant resin system
- Continuous, straight bidirectional reinforcements (3 layers)

APPLICATIONS

- Aluminum
- Chemical
- Cement
- Cooling Towers
- Corn Processing
- Desalination
- Electronics
- Fertilizer
- Food and Beverage
- Galvanizing/Plating
- Metal Processing
- Marine/Port Facilities
- Mining
- Military
- Natatoriums
- Pulp and Paper
- Power
- Rendering
- Salt
- Textile
- Waste Treatment
