

MASS TRANSIT

Third Rail GRP/FRP Coverboard

High Strength | Corrosion Resistant | Labor Savings

Enduro Third Rail Coverboards are custom designed to provide safety by shielding or insulating personnel from a rail that is "live" or may contain stray current. Our fiberglass light rail covers are made of high-performance, high-strength, easy-to-install composites and exceed the most stringent ASTM testing requirements. For custom engineered solutions, contact an Enduro representative for assistance with material selection and specification.

FEATURES

- Exceeds transportation safety tests
- Provides low smoke development
- Provides low toxicity characteristics

BENEFITS

- Corrosion resistance
- Weight savings
- Non-conductive

APPLICATIONS

- Domestic and international
- Bart and LA systems
- Vancouver Skytrain and Kuala Lumpur
