

PROJECT SCOPE:

Odor Control Improvement
Grease Receiving Station

OWNER:

City of Flagstaff, AZ

YEAR INSTALLED:

2009

ENDURO PRODUCTS: TuffSpan™ XL6 FRP Tank Cover Panels

APPLICATION SUMMARY: The client was in need of a cover system that would reduce odors, resist corrosive environment and block sunlight (UV) out of the process. In addition, they required a cover that would provide a safe, walkable surface for plant personnel.

SOLUTION: Enduro provided a fully gasketed, walkable, odor control cover system with a low profile to help meet the owner's needs.

TESTIMONIAL:

"They do their job and control the odor problem; we sometimes forget they are there. They also stand up to sun exposure. You don't get much worse than Arizona especially at our elevation, as you can see 10 years later and they have done their job."

- Operator, City of Flagstaff, AZ
